remote events on demand

Bring events to your venue with **REOD**, the state-of-the-art holographic technology.

REOD is the network of Next Generation Services that empower existing and future public venues to provide live events for your patrons with a new state-of-the-art 3D live holographic technology.
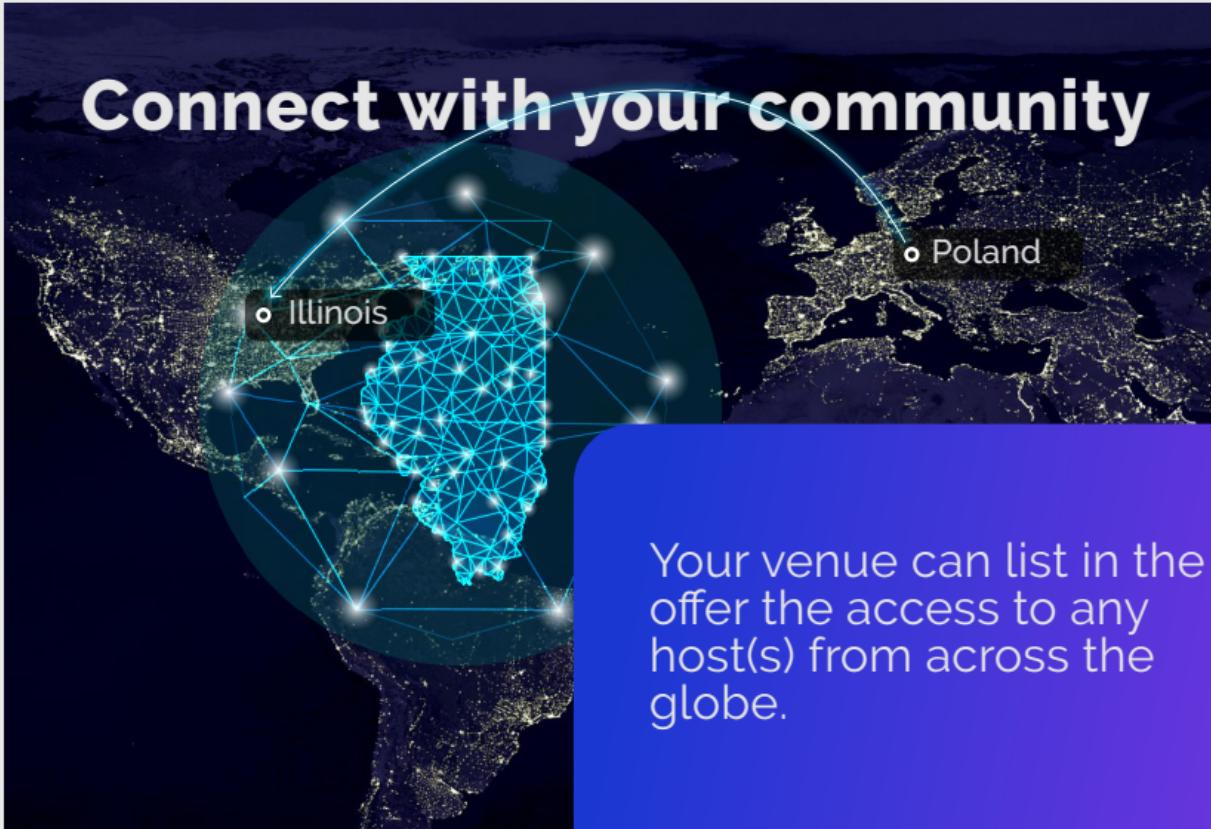

Enhance your reach with live interactive events.

REOD provides a life-size 3D hologram stage that displays a live, interactive host (or hosts) your patrons can connect with. You can place your offer for events for any community (ethnic, social, religious and even political).

Discover the cheapest way ever of organizing an event with hard-to-get, expensive hosts.

remote events on demand

Connect with your community

Greece

Australia

With **REOD**, you get the desired host without the cost for transportation, hosting and also, most important, host time and availability.

For your ethnic events

Your patrons will gain access to their favorite entertainer for their wedding, e.g. assuming that they are Greek nationals living in Sidney Australia

Then, they will book their favorite from Athens for that day and best local hour in AU and they will have access to that entertainer, in form of a live hologram, but fully present by means of telepresence.

For your social events

Your venue will have the unique same-day ability to give your patrons the opportunity to participate in live interactive gatherings with host(s) that are completely available, except for physical interaction.

Your patrons can ask and get answers, they are visible to the host(s) so they can also interact visually with them.

How it works

REOD will install a life size holographic stage and the necessary equipment for telepresence in your venue. The requirements for such equipment demand a space chosen after a place analysis and carefully planned deployment. This does no mean that the availability of **REOD** would be limited, but it could affect the costs.

The your venue will be assign a node in **REOD** network and a designated client account will be setup for you to access the network booking system.

How it works (continued)

Your patrons will get access to a very large variety of available hosts, please note that hosts agents may limit availability both in time and date.

The **REOD** platform will list the price per slot per host, if available, and then you can book the host for the slot that is right for your clients. The booking will be charged and a contract will be borne only after the host(s) agent final confirmation.

Costs

REOD is charging a monthly fee for the network node, for this you can have access to a list of included in your subscription live events, from all over the world, this events are point to multipoint and for this reason they are NOT fully interactive.

Interaction will exist in a limited form, with a designated point of communication in each venue.

Costs

For live interactive events REOD will charge a fixed fee per slot of 30 minutes. If your event is requiring more than a slot you can book as many as you wants as part as your event.

The host(s) costs are totally dependent on their list price and will be contractual only after final confirmation from the host(s) agent.
